SECRET

REAL ESTATE AND CONSTRUCTION DIVISION  
LOGISTICS OFFICE

Discussion

1. No significant organizational changes are required in the Real Estate and Construction Division; however, it is proposed that the Space, Maintenance and Facilities Branch be divided into four sections as shown in the organization chart. The three geographical sections conform closely to the organization of the Public Buildings Service. This arrangement will facilitate the accomplishment of the large volume of work processed through the Public Buildings Service.

Justification

1. The staffing of the Real Estate and Construction Division proposed herein is based on past and current workload and the number of personnel presently assigned. Based on these considerations and anticipating future workload at the present level, a Table of Organization of  is proposed. The present approved Table of Organization consists of  positions.
2. Individual projects are assigned to project engineers in the Construction Engineering and Utilities Engineering Branches. As these projects vary widely in monetary value, amount of planning necessary, and the degree of actual supervision, follow-up, and liaison which must be maintained with prime contractors, no arbitrary work unit-manhour relationship is meaningful. However, there are a total of 16 construction projects and 5 architect engineer projects now in progress in total amounts of \$14,698,552 and \$251,300 respectively.
3. The Acquisition Branch supports and administers approximately  properties or  properties per Realty Officer.

SECRET

REAL ESTATE AND CONSTRUCTION DIVISION  
LOGISTICS OFFICE

Justification Cont'd

25X1

4. The Space Maintenance and Facilities Branch handles approximately 1,385,900 square feet located in  separate locations. It has handled an average monthly workload of 350 non reimbursable and 81 reimbursable work orders with Public Buildings Service in addition to 172 other requests. As the nature of these requests and work orders are varied as to type of activity and scope, no significant conclusions can be drawn for purposes of comparison or work measurement.

SECRET

STATEMENT OF FUNCTIONS

REAL ESTATE AND CONSTRUCTION DIVISION

LOGISTICS OFFICE

1. Directs the over-all real estate, construction, and housing programs of CIA, including engineering surveys, appraisals, acquisition, design, construction, utilization, repair, maintenance and utilities.
2. Exercises staff and technical direction of all real estate and construction activities conducted in the field under delegated authority.
3. Consults with and advises staff and operating officials of CIA with respect to real estate and construction requirements involved in proposed and approved projects and programs of the CIA.
4. Determines or reviews architectural and engineering requirements for construction projects and provides for the preparation of plans and specifications.
5. Provides or arranges for the architectural and engineering supervision, [redacted] where necessary, of the actual construction of approved projects. 25X1
6. Provides or arranges for utilities engineering supervision, [redacted] in connection with operation and maintenance, power installations, sewer and water systems, heating, air-conditioning, and refrigeration requirements of approved projects. 25X1C
7. Provides for the acquisition and utilization of real property, [redacted] as may be necessary, to meet the requirements of Agency programs and projects. 25X1
8. Plans for the long range space requirements of CIA.
9. Prepares procedures, regulations, and standards as may be necessary to carry out the functions of the Division.
